A lightning caused 1 acre fire in spruce was knocked down with bucket work from 73LF. When the fire began spotting, a load of retardant was requested, which slowed the fire's spread long enough for ground personnel, traveling in difficult terrain, to gain access. Mop up is expected to require 2-3 days.

High temperatures and low humidities contributed to another day of active fire behavior. Wind speeds in the area were lower than predicted. Burnout operations were successfully conducted in Division C, supporting control objectives to keep the fire north of Brigadier Road and within the impact area. Using aerial ignition, approximately 2 miles of line was burned - totaling 300 acres. Structure protection was in place and resources on scene around military assets. Similar operations will likely continue through today. Mop up continued in Division S and the southern portion of Division A. Division R resources will continue to patrol. Seeding continued in repair areas on the west side of the fire. Aircraft, including air attack, scoopers, retardant planes, and helicopters will be vital to minimize potential fire spread, assure continued containment around the fire perimeter and support burnout operations during the next operational period. Midnight Suns were released from fire 588 and joined Stuart Creek 2 suppression forces in the PM.
